Komal Jangid

komal-004 komal-jangid 004komaljangid@gmail.com +91 8233250290

Summary

Second-year B.Tech CSE student equipped with strong programming knowledge, data structure and analytical problem-solving abilities, passionate about building real-world technology solutions.

Education

B.Tech in Computer Science and Engineering, 2024 – 2028 2024 – Present
JK Lakshmipath University, Jaipur

Projects

Smart Public Transport & Ticketing System GitHub

- Developed a Smart Public Transport and Ticketing System as part of a team project.
- Designed responsive frontend interfaces using HTML and CSS for transport tracking and ticket booking.
- Implemented backend functionality using JavaScript with MySQL integration for secure data storage, while enhancing passenger convenience, transparency and efficiency in public transport services.

Face Detection GitHub

- Developed a real-time face detection application using Python and OpenCV.
- Used HaarCascade classifier to detect human presence from a live webcam feed.
- Gained hands-on experience in computer vision and image processing by drawing real-time bounding boxes around detected faces.

Stock Price Prediction GitHub

- Developed a Python-based stock price prediction application using Linear Regression on historical data.
- Enabled user-driven analysis by allowing custom stock symbols and date ranges with real-time data fetching.
- Visualized actual and predicted stock price trends using Matplotlib for trend analysis.

School Dropout Risk Prediction in Government Schools GitHub

- Developed a machine learning model to predict dropout risk among students in government schools using Python.
- Performed data preprocessing, feature selection, and model training to identify key factors affecting student retention.
- Evaluated model performance using accuracy, confusion matrix, and F1-score, helping support early intervention strategies.

Experience

Design Team Head Jaipur
Technology Club Aug 2024 – May 2025

- Designed posters and social media creatives for technical events.
- Maintained visual consistency and branding for club activities.

Drone Technology Program IIT Goa
(Drones and Related Technology) Center for Drone Applications June 2025 – July 2025

- Learned fundamentals of drone systems and AI/ML-based drone vision.
- Gained hands-on experience in drone hardware integration, flight control basics, and real-time camera vision processing using AI/ML models.

Backend Developer Intern Noida
Saffron Synaptiq Private Limited June 2026 – August 2026

- Worked on real-world projects, gaining practical experience in backend development and software engineering workflows.
- Developed and maintained backend functionalities using Node.js.
- Worked on REST APIs, JWT-based authentication and API documentation using Swagger.
- Gained hands-on experience in integrating LinkedIn OAuth and implementing backend features for a CRM digital marketing solution.
- Collaborated on project development, debugging and testing to improve functionality and reliability.

Skills

Programming Languages:	Python, C++, C
Web & App Development:	HTML, CSS, Bootstrap, JavaScript
Databases & Tools:	MySQL, MongoDB
Version Control & DevOps:	Git, GitHub
